Meet the Sun Conure!

These birds are famous for their brilliant plumage, which includes golden-yellow feathers, orange-flushed underparts and face, and green and blue-tipped wings and tails.

The Sun Conure, also known as the Sun Parakeet, is a medium-sized parrot native to northeastern South America.

Sun Conures are highly social and typically live in flocks. They form monogamous pairs for reproduction and nest in palm cavities.

These playful and affectionate birds are known for their loud calls and can live up to 30 years.
